macProVideo.com Turns 4!

Can you believe that macProVideo.com is turning 4!?! I've often heard it said that if you make it past 3 years, you've got a successful business. Well I'm pleased to report, WE DID IT!

And what a year we had. This year saw us more than double our tutorial-video catalogue with some incredible new titles by our industry-leading educators. We released new Logic

titles by Steve H., Olav Basoski, David Issac, and J.F. Brissette, new Final Cut Studio titles by Michael Wohl and Jim Kanter, and many, many more.

Significantly, in the Fall of '08 we started designProVideo.com, a site dedicated to graphics tutorials. There you can find all sorts of Adobe CS4 tutorials including Photoshop, Flash, Dreamweaver, Acrobat, Lightroom, and InDesign tutorials by some of the world's leading technical authors including Robert Reinhardt & Snow Dowd, Ted Padova, Joseph Lowery, and Donna Baker.

Our software tutorial player, N.E.D. (Nonlinear Educating Device) has undergone significant updates including a new User Interface and enhanced playback controls. But there's more to come ... we're constantly working to make N.E.D. a better application and we'll have a new N.E.D. for you soon. And BTW, do any of you have iPhones? Stay tuned ... :)

As macProVideo.com turns 4, I'm looking 4-ward to the year ahead! There are some amazing Pro Tools, Adobe CS4, iLife '09 and other tutorials in production now ... indeed, I intend to at least double our tutorial library again in the year ahead. We're also working on some (what I think will be) revolutionary new deployment technology that will be released in the coming months. This is going to be an exciting year at macProVideo.com ...

So with our 4 year anniversary at hand, I'd like to thank you for helping us become the go-to place for premium software tutorials. I could not have built this business without the support of patrons like you!

Thanks all!
